

Concrete Finisher

Job Summary:

We are looking to employ a Concrete Finisher Laborer to be responsible for designing and building forms, pouring concrete, then spreading and smoothing it using trowels or other tools. You may also be required to apply stains to finish the concrete, adding small stones for decoration, and concluding the process by applying waterproofing and sealants.

To be successful as a Concrete Laborer, you should be up to date with the latest technology involving concrete work, possess the knowledge and skill of a specialist in the field, and maintain a high standard of work. Your ability to meet job specifications and make top class finishes in concrete work will ensure your success.

Position Requirements:

- Experience in building: sidewalks, ramps, aprons, grade beams, pile caps, pads and slabs
- High school diploma
- 3-year apprenticeship under journeymen workers
- 2,000 hours of hands-on experience
- Ability to perform strenuous tasks with your hands
- Ability to kneel, bend and lift heavy materials
- CSTS-09 with WHIMIS
- Valid Class 5 driver's license, reliable transportation, and a clean drivers' abstract
- First aid and other training certificates are considered an asset

Position Responsibilities:

- Designing and building forms
- Setting up the forms
- Pouring concrete
- Using wire mesh to reinforce the concrete
- Spreading and smoothing concrete
- Molding expansion joints and edges
- Using stains or colors to add the finishing touch
- Adding stamps or other materials for decoration
- Applying waterproofing and sealant to protect the concrete work
- Monitoring the material to ensure it hardens to a durable finish

What we Offer

- Opportunity for career advancement and training
- Industry leading benefits
- Rewards and recognition for performance

Compensation:

- Negotiable depending on experience
